FOUR LEADING PROFESSORS ADDRESS CIVILS TO-NIGHT

First Civil Engineering Dinner Of Year In Union At 6.30

The Civil Engineering Society will hold its first dinner tonight at 6:30 P. M., at the Union. The speakers of the evening will be Dean Burton, and Professors Spofford, Porter and Allen. Under the new management of the civil engineering department, the later three men rank equally as heads, and with the Dean, are the best representatives of this branch of engineering at the Institute. Besides a large attendance of old men, a good number of sophomores are expected.

As men in the second year of Courses I and XI are eligible to membership, the officers expect that a large percentage of 1912 will apply to them for admission.

As in previous years, it is expected that several excursions will be taken to places of interest to engineers, and afford to the members much knowledge of a practical nature. Later in the year other dinners will be given at the Union and down town.

PROFESSOR DOTEN REQUESTED TO WORK ON CENSUS

One Of College Professors Who Aided Government

Professor C. W. Doten has been requested by the director of the thirteenth census to continue his work as expert special agent during the three years of the census period. This request is the result of Prof. Doten's summer work in Washington.

Fifteen college professors representing all sections of the country were called to the capital to spend the summer in advising the director and chief statistician regarding the formulation of schedules to be used in taking the census. Prof. Doten was one of the four men from the leading New England colleges: Harvard, Yale, Dartmouth; U. of Wis., U. of Min., U. of Kansas, Cornell, U. of Texas, and the Carnegie Technical School were also represented.

Professor Doten and seven others devoted their time to the census of manufacturers. Besides the general schedule covering all kinds of manufacturing establishments, Prof. Doten's particular line of work was the preparation of special schedules for the enumeration of the several branches of the textile industry. The taking of the census will commence January 1, 1909, and will cover the fiscal year, 1909.

This is the first time in the history of the census that such careful preparation has been made for a scientific enumeration, and the census authorities feel that material improvement has been made in many lines. There will be about fifteen hundred college men under the direction of twenty or thirty expert special agents taking the census of manufactures. Sixty-five thousand enumerators under the direction of about three hundred and thirty supervisors will be engaged in taking the census agriculture, and in the enumeration of the population.

Professor Doten will continue his work if the time required does not interfere with his Institute duties.

ORGANIC CHEMISTRY THESIS WORK

Third Volume of Prof. Mulliken's Nears Completion

Organic chemical research was the summer occupation of two students of the Institute. As thesis work, H. P. Trevithick 1910 and R. C. Kerr 1910, made a study of the dye-stuffs contained in food.

Recent legislation, both State and National, commonly known as "pure food laws," has prescribed what coloring matters may be used in foods. For the enforcement of such laws, special methods of analysis are necessary. This thesis on the identification of organic dye-stuff in mixtures as employed in foods will aid greatly by the improvements, methods for testing for such colors. For this thesis the laboratory work was completed during the summer, and as soon as the results have been worked up, the thesis will be submitted to the faculty for approval. The men are graduate students, candidates for the degree of S. B.; Trevithick having a Ph. B. from Wesleyan and Kerr, an A. B. from Johns Hopkins.

Professor Mulliken has, during the past summer, been completing the manuscript for the third volume of his work, "General Methods for the Identification of Organic Materials." The new volume will be entitled, "The Identification of Commercial Dye-stuffs." It will be printed by the Stanhope Press, of Boston, and published, as the other volumes have been, by John Wiley and Sons.

TENNIS TOURNAMENTS ENTRIES CLOSE TO-DAY

Entrance of New Men Makes Results Uncertain

The entries for the fall Tennis Tournament close today at 5 P. M. The list of eight men ranking first and their relative order has been posted, as decided from the standing last May, and the results of the intercollegiates.

The entries are to be left at the Cage for P. M. Wentworth 1910, manager. The entry fee for singles is 75 cents per man, and $1.50 for doubles per team. The results of drawings will be posted in Rogers, Saturday morning, at 9 A. M., and where possible the preliminary rounds should be played Saturday afternoon. However, all matches must be played by Wednesday, October 13, or they will be defaulted. Each man is expected to look up his opponent immediately and make arrangements for the match. As is usual, each man is required to bring three new balls and three are to be used in the match. The winner takes the new, the loser, the old balls.

Matches may be played on any court, and any man wishing to enter the doubles and knowing no one who plays, may leave his name for the manager, who will try to find a partner, however, there will be no guarantee of quality.

Last year a system of grading players was adopted. Under this system ten men were picked and graded. Any man of the ten might challenge the next above him, and if he was victorious, would ascend to his place. Also, any one not listed could challenge the lowest man on the list, and if successful,

(Continued on page 3.)

1913 CLASS MEETING DISCUSSES CONSTITUTION

Copeland Appeals For Better Support Of Teams

The meeting of the class of 1913, as announced at last Tuesday's meeting, was called to order by temporary Chairman Holmes, a few minutes after one o'clock yesterday. The minutes of the Tuesday meeting were read and accepted.

S. B. Copeland 1911, who is taking charge of the 1913 tug-of-war practice, spoke at some length on the necessity of getting more men out for the various teams. The football team, he said, is the only one for which there are enough candidates to pick a team from, and added that the responsibility for getting men out rested with each member individually. Seventeen men were the most that had been out any one night this week for the tug-of-war team, and at least forty men should be out to stimulate the requisite amount of competition for the twenty-five places.

At the close of Copeland's talk, Chairman Holmes said that he had been asked to speak of the necessity for candidates for the freshmen band, and that any who could play some instrument should go out for the band, in order to make it more successful this year than it has been in the past. In spite of the slim attendance, Holmes decided that it would be best to devote the meeting to a consideration of the constitution, in which the committee appointed Tuesday have been working. The draft prepared by this committee was then read by H. M. Rand.

The constitution is adopted from that of the junior class, with some minor alterations, and was adopted by the members of the class present without and changes.

In accordance with the provisions of this constitution, Chairman Holmes appointed an election committee consisting of F. R. Barker, chairman; George Richter, S. H. Champlin, P. M. Hamilton and C. J. Fallon.

Members of the class of 1913, should note that nominations for officers should be made out on a paper signed by ten members, and handed either to any of the committee on elections, or left at the Cage for this committee. Nominations close Monday of next week at 4 P. M. Ballots will be sent to all members of the class, but only those who have paid their dues of $1. previous to the election will have the ballots counted. Another provision of the constitution is that it is to be signed by all the members. Secretary Buchard should be seen about this matter by all freshmen.

WIRELESS MEMBERS MEET TO-DAY

The Wireless Society is about to complete plans for the erection of a receiving station at the Institute. The society is well established at the present time, and the equiping of a modern and efficient sending station is the most important move that will be made this year. A committee was appointed Monday by the board of directors to investigate this matter, and their report will be made at the meeting this afternoon.

The membership of this society has increased considerably this term and any new men who are at all interested should be present this afternoon. There are no membership dues, and all stu-

(Continued on page 3.)

TECHNIQUE ART REGULATIONS CHANGED

Board Decides To Credit Even Unaccepted Drawings

The board of editors has granted an extension of time until Nov. 1, 1909, to the competitors for positions on the art staff of Technique 1911. This was done to give an equal opportunity to all men who had a desire to make the staff. Many have not had the time during the summer to prepare their drawings, owing to their summer work taking most of the time. Every man in course IV should submit drawing, and all other members of the junior class who can draw should hand in sketches, even if not for the staff.

Competitors are required to submit one full page drawing and one heading, or three headings. More than this may be submitted. The full page drawings need not be colored, but if colors are to be used, their nature is to be indicated. All headings are to be made in pen and ink. Those men who have submitted drawings during the summer, equivalent to these requirements, need not do extra drawings unless they wish to do so.

This year's board has decided to credit men with every contribution made to Technique, whether accepted or rejected. In this way it is a considerably benefit for underclassmen to contribute in any or all departments, as the records of these contributions will be given to the succeeding electoral committees to aid in the choice of future Technique boards. Thus it is seen that work for the present Technique will be a step toward a position on the board of later Techniques.

It is the desire of the grind department to have a man in each section of the freshmen class and one in each course in the three upper classes to collect grinds. Accordingly, any men who are willing to do this are earnestly requested to leave their names at the Cage for O. B. Denison, grind editor. These collectors will have a splendid chance to get one of the cash prizes offered by the department for the best collection.

D. R. Stevens, editor of Technique 1911, will be glad to meet all men who are interested in the work of any department. Word will reach him through the Cage.

HARVARD GIVES DEGREE TO DOCTOR NOYES

Thirty Delegates To Lowell Inauguration So Honored

At the inauguration of President Lowell of Harvard, on Wednesday morning, that university conferred on Dr. Arthur A. Noyes, the degree of Doctor of Science. In presenting the degree, President Lowell addressed Dr. Noyes as a "chemist of renown, a leader of research in physical chemistry. As professor at the Massachusetts Institute of Technology, and recently its head, our neighbor, our fellow-laborer and our friend."

The same degree was also conferred upon Dr. Elihu Thompson, non-resident professor of applied electricity at the Institute, and of him it was said, "a magician, who by the witchcraft of science has subdued electricity to the service of men." Among the thirty recipients of degrees, were two others well known to Institute men through their books, the Hon. James Bryce, and President Ira Remson of Johns Hopkins.

BOSTON, MASS., OCTOBER 8, 1909.

At a meeting of The Tech yesterday, the following appointments were made, to go into effect Monday, October 11th: Joseph I. Murray 1912, assistant athletic editor; D. P. Gaillard 1911, assistant Institute editor; Gerald M. Keith 1912, assistant exchange editor; Johannes Ahlers 1910, assistant society editor.

A leave of absence for the remainder of the term was granted Wellesley J. Seligman 1911, athletic editor; and Orville B. Denison 1911, as both men are on Technique 1911.

The following men were also promoted to Associate Editors: L. S. Walsh 1912, E. B. Moore 1912, N. McL. Sage 1912, and K. N. Wildes 1912.

CALENDAR.

Friday, October 8.

4:00 P. M.—Mandolin club trials at Union.
4:15 P. M.—Practice at Field and Oval.
4:00 P. M.—Wireless meeting of members at Union.
5:00 P. M.—Tennis entries close.

Saturday, October 9.

2:15 P. M.—Tech orchestra rehearsal, Union.
8:00 P. M.—Brookline H. S. Club meeting.

Monday, October 11.

4:00 P. M.—1912 and 1913 nominations close.
4:15 P. M.—Practice at Field and Oval.
4:30 P. M.—Mandolin Club rehearsal.

Tuesday, October 12.

4:15 P. M.—Glee Club trials at Union.

Foundations are now being laid for a new vivarium for the biological department of Princeton University. A botanical garden will be laid out in connection with it and also a green house for winter use. The particular aim of the vivarium is to make possible a study of the habits of many amphibious animals, about which there has been little accurate scientific knowledge heretofore, on account of their habit of burying themselves in the mud along the steams. When completed, this will be the first of its kind in this country, although the University of Chicago is making plans for a similar building.

BIG BUZZ WAGON FOR OLD SHOW MEMBERS

Large Crowd Will See Field Day and Make Merry

Tech Show 1909 is to have a great big buzz wagon for Field Day this year. Old Show members will be there in full force, ready to sing, shout, yell, and have another one of the good old times that they will always remember—just "The Kind That Mother Used to Make." Plans have been made to get the biggest, brawniest, fastest buzz-wagon that can be had, and with some of the men in costume, and the rest in the best of humor, aided by a cornet or two, this buzz-wagon bids fair to go down in the annals of the Show history as another of her successes.

Invitations will soon be sent out to old Show men, whether of last year's, or any other previous Show. The management regrets that there are only about forty seats in the wagon, which will probably necessitate disappointing some of the men who want to go. The only fair way to settle the difficulty is to allot the seats in the order in which applications are received, and this plan will be followed.

TENNIS TOURNAMENT

(Continued from page 1.)

take his place. However, a rule was made for the benefit of this man, that he was not required to play but one match each week, in order that pressure of work might not cause him to abandon his place.

From the list on May 1st, the first two will be chosen to represent the Institute at the Intercollegiate Tournament at Longwood. For other tournaments and games with other colleges, the first four on the list will be selected.

Although the men were selected last year, graduation and withdrawal has diminished the list so that the ranking as now posted reads: 1, Parker; 2, Coville; 3, Sweet; 4, Wentworth; 5, Harkness; 6, Whittemore; 7, Williamson; 8, Price. After the tournament the list will be regraded and perhaps increased again to its former size.

CURRENT EVENTS

French papers declare that it is now time for France to interfere in the Spanish conquest of Morocco, in order to save the economic and political interests of Africa, as Teza, which is the natural outlet of Algeria to the Atlantic, is likely to fall before the Spanish troops. Spaniards declare King Alfonso weak and without prestige, and a revolution not only possible, but easy and necessary.

Annapolis is about to challenge West Point to contest with them this winter in basketball, gymnastics, rifle shooting, and fencing. The authorities favor rifle matches, and if dual fencing is adopted, the two academies would probably withdraw for the association.

A bill is now before the Canadian Parliament to provide for twelve warships to be built in the next six years at the expense of twenty millions.

President Taft is now in California, where he spent the last three days in sightseeing and restful traveling. He will not speak again until Sunday, when he reaches Fresno.

FOURTH YEAR.

Journals—Course VI, will meet in 25b Lowell, instead of 29 Lowell.

8-9.

FIRST YEAR.

Course B, in Military Science, will meet Tuesday from 4 to 5 in room 32, Eng. C.

8-9.

COURSE XIII-A.

The room assignment for A. C. machinery, course XIII-A has been changed and is as follows: Mondays, 11-12, 24 Lowell; Saturdays, 9-10, 30 Lowell.

MEETING.—Brookline High School Club, Saturday, Oct. 9, 8 P. M., at Al. Kenick's, 26 Bowker St. First meeting of the year. It is important that all members be present.

GLEE CLUB.—Trials will be held Tuesday, Oct. 12, at the Union. New men stand an equal chance with old men of making the club. Men are needed on all parts, especially first tenors, and a quartet is to be formed, so there is abundant opportunity for all good men.

CROSS-COUNTRY.—Hare and hounds at Needham tomorrow afternoon. Take 2:16 train from Back Bay. Round trip 30 cents.

TO LET.—Large room for two, at 109 Summer St., Som. 22 min. from "Tech." Room and two meals per day, $4.50 per week. 3tFSM

TO LET.—Two square steam heated rooms with use of sitting room, at $2.50 per week. Apply at 407 Ruggles St., off Huntington Ave.

The first game of the Pittsburg-Detroit post season series will be played tomorrow. Elaborate police arrangements and numerous exits have been made to insure protection and safety for the enormous crowds.

WIRELESS SOCIETY

(Continued from page 1.)

dents at the Institute are eligible for membership. Shingles will be issued to all members within a very short time.

A.P. Morgan, who was vice-president of the Wireless Society, is not at the Institute this year, so a new man will be elected for this position. Notices as to the coming lectures on different wireless topics will be given out and the names of the lecturers. Everybody who is interested should make it a point to be at the Union at 4:00 P. M.

If anything could be offered as a justifiable excuse for ducking a freshman in the boneyard, it is the practice of wearing high school pins, sweaters, caps, and other emblems from preparatory schools. Aside from being a pernicious habit, it stamps a man as being more proud of his past record than he is loyal to his newly chosen Alma Mater.—The Daily Illini.

The first grain elevator in Russian Asia will be built soon at Tchalabinsk, along the Siberian Railroad.

Every Saturday afternoon this fall, the Daily Cardinal of the University of Wisconsin is to run a football extra, containing an account of the game played by the home team that day, and the score of all other games.
